

	Bug Description	Expected	Actual
patient dashboard	In add new provider Address 1 and Address 2 field is not accepting numbers.	in Patient side, medical report & mri page while adding new provider address1 address fields are cannot add numbers as address	I can type numbers and some special carecters '(),.": /?#@*%'
patient dashboard	Patient dashboard --> insurance expiry --> appointment form --> It shows "Insurance Match," but the lower amount is being charged.	when check network api you have check insurance expired validation also if insurance expired that is also no matched and massage show like insurance expired if that in active status and also not matched other insurance	that validation not checking
Practice location	Practice location ---> insurance --> Practice Location, when there are more than 3 doctors, the doctor dropdown list does not allow the user to select a doctor.	In location side in insurance page if have more 4 dr's if i add new dr, and when i select that last new dr that dr insurance details not fetching data	that will fetch for that dr and show the insurance and if no insurance that will slways show
patient dashboard	in patient side if the amount is 0 that time disable the paynow button	in patient upcomming appointment and live upcomming appointment side if the amount is 0 or 0.00 that time disable the paynow button	that button is enabled
Appointment Form	Guest normal appointment --> submit --> system display "Validation error: incorrect dob"	in createshortappointment (guest appointment booking api) that time if are you insured == 'No' and do you have insurance == 'No' in that case no need to create insurance user or insured data	that creating insured code is there
patient dashboard	Patient dashboard --> live appointment --> Reschedule ---> timezone is not displayed	When I reschedule appointment in patient live upcomming appointment that patient tz not showing once i refreshed that page that time showing patient time zone	if i reschedule live appointment that time not showing patient time zone time, (I think backend not sending that needed details)
patient dashboard	Patient dashboard --> associated member dashboard --> When the associated member is on the dashboard, they suddenly appear on the Patient Dashboard.	if i changed the assosiated member dashboard and if i click live doctor button that time page is gone to the registered patient dashboard that will be in the same associate page	once i changed the dashboard details if i click live doctor button that time changed to main patient dashboard
patient dashboard	In patient dashboard -> pharmacy info -> add pharmacy address field is allow only 20 characters	in Patient add pharmacy side i can enter max 50 char	but i can type max 20 char
