Screens tested

Login page; My appointments (Requests, Upcoming, Cancellation requests, Past, Cancelled tabs) and the Receipt modal; My calendar; Appointment book (week grid, stacked blocks, legend) and the appointment details modal (Client tab, Pet details tab with Comments/Medical/Grooming/Personality/Recent visits/Photos sub-tabs, Services & groomer revenue section, Appointment log); My availability (Slot calendar, Weekly hours & week off, Time off & breaks, Slot colors); Book for customer (options and open slots); Forecast & reports (Forecast and Financial reports tabs); Customers list and customer/pets modal; Notifications; Profile; mobile/tablet header and navigation drawer.

Screens or modules not accessible / not fully reviewable

- Groomer Dashboard - the groomer portal has no dashboard screen; after login it opens 'My appointments'.
- Services & Subtasks / Packages masters - not available to groomers (admin-only). Service lines and add-ons were reviewed inside the appointment details modal.
- Milestones - 'Open visit milestones' in the appointment modal did not open a dialog during testing, so the milestone screen could not be reviewed.
- Settings - there is no separate settings screen; only Profile is available.
- Requests tab with data, Accept/Decline UI - no pending requests existed for this groomer (empty state only).
- Book for customer confirmation step, 'New working day', 'New time off', Edit/Delete dialogs - not opened beyond the list views, to avoid creating or changing records.

Checked and found OK (not reported)

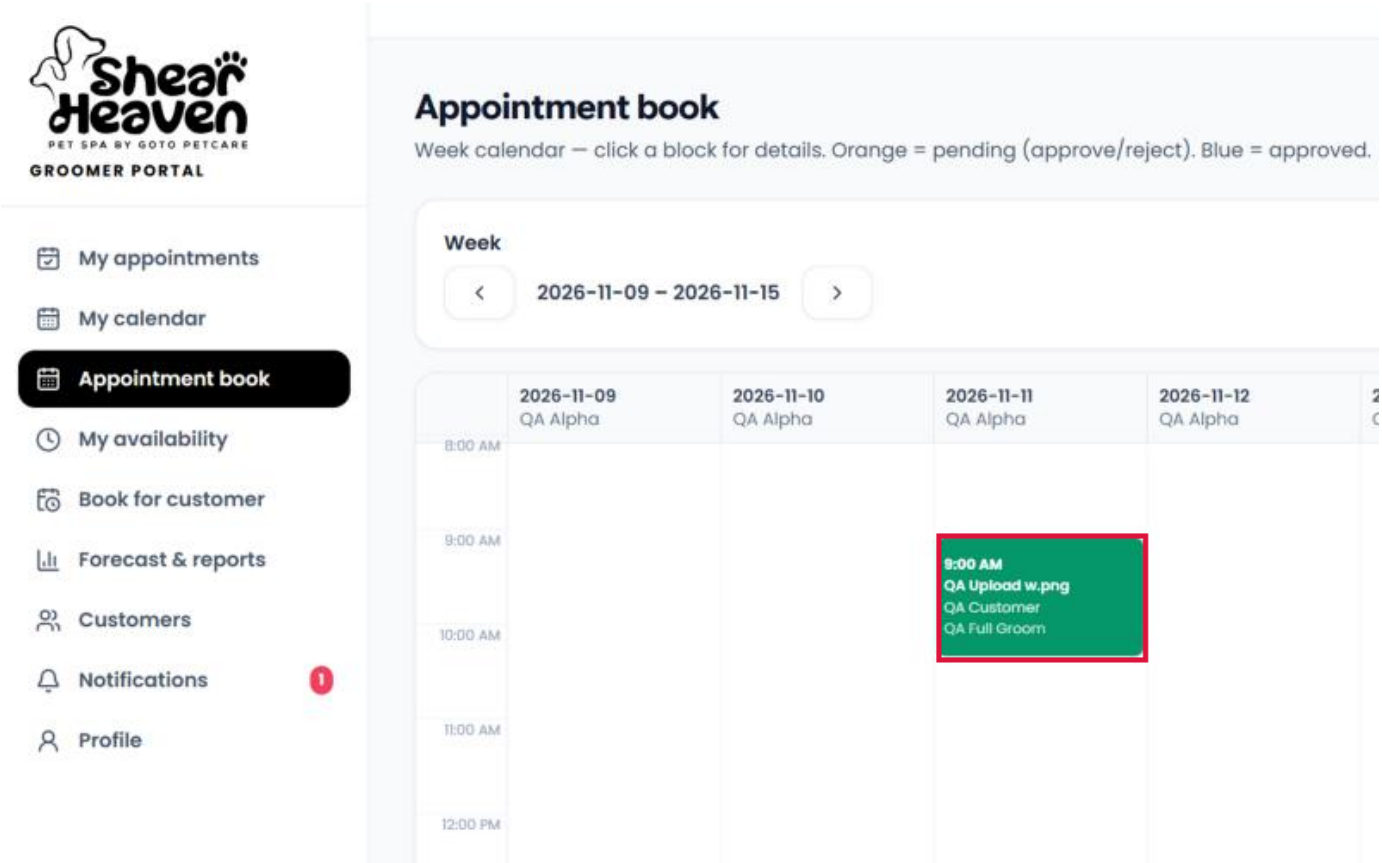

No horizontal page overflow at 375/768/1440 px; sidebar navigation, active states and notification badge; receipt modal layout; profile form and native required-field validation; financial report tables (scroll within their container); notifications list; tablet layout of My appointments; mobile drawer layout; loading states ('Loading...' with spinner) on Forecast and Financial reports.

UI-GR-01 - Two appointments at the same start time are drawn on top of each other - one is hidden

Bug ID	UI-GR-01	**Severity**	Medium
Page / Section	Groomer portal - Appointment book	**Viewport(s)**	Desktop 1440x900; Tablet 768x1024; Mobile 375x812

Steps to reproduce	1. Log in at https://pcmdev.shearheavenpetspa.com/login as groomer QA Alpha (qa.alpha@shearheaven.local). 2. Open Appointment book. 3. Look at Wed 2026-11-11, 9:00 AM.
Actual result	Only one block ('QA Upload w.png') is visible at 9:00. A second appointment at the same time ('QA Bella', same groomer) is rendered at exactly the same position (left 652, top 373, width 144) underneath it and cannot be seen. Other overlapping slots (12:45 PM, 5:00 PM) correctly show a stacked block with a count of 2.
Expected result	Simultaneous appointments are shown as a stacked block with a count (as at 12:45/5:00) or side by side, so no appointment is hidden.

Evidence

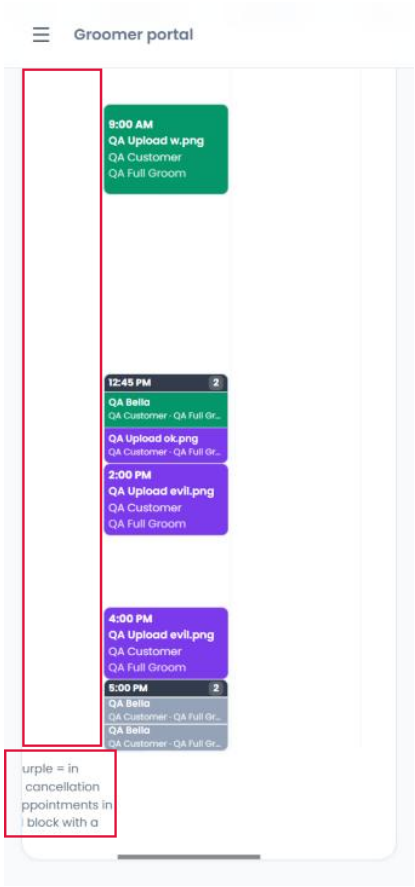

Desktop - only one block visible at 9:00 on 11 Nov

UI-GR-02 - Time axis scrolls out of view and the colour legend is clipped inside the horizontal scroller

Bug ID	UI-GR-02	Severity	Medium
Page / Section	Groomer portal - Appointment book (mobile)	Viewport(s)	Mobile 375x812

Steps to reproduce	1. Log in at https://pcmdev.shearheavenpetspa.com/login as groomer QA Alpha (qa.alpha@shearheaven.local). 2. Set the viewport to 375x812 and open Appointment book. 3. Scroll the week grid sideways to reach today's column.
Actual result	The time labels (8:00 AM...) are not sticky, so after scrolling sideways the blocks have no time reference. The colour legend paragraph ('Orange = pending - Blue = confirmed - Purple = in progress...') sits inside the same horizontal scroll area and is cut off ('urple = in / cancellation / ppointments in').
Expected result	Time column stays pinned while scrolling horizontally, and the legend is placed outside the scrolling grid so it is always fully readable.

Evidence

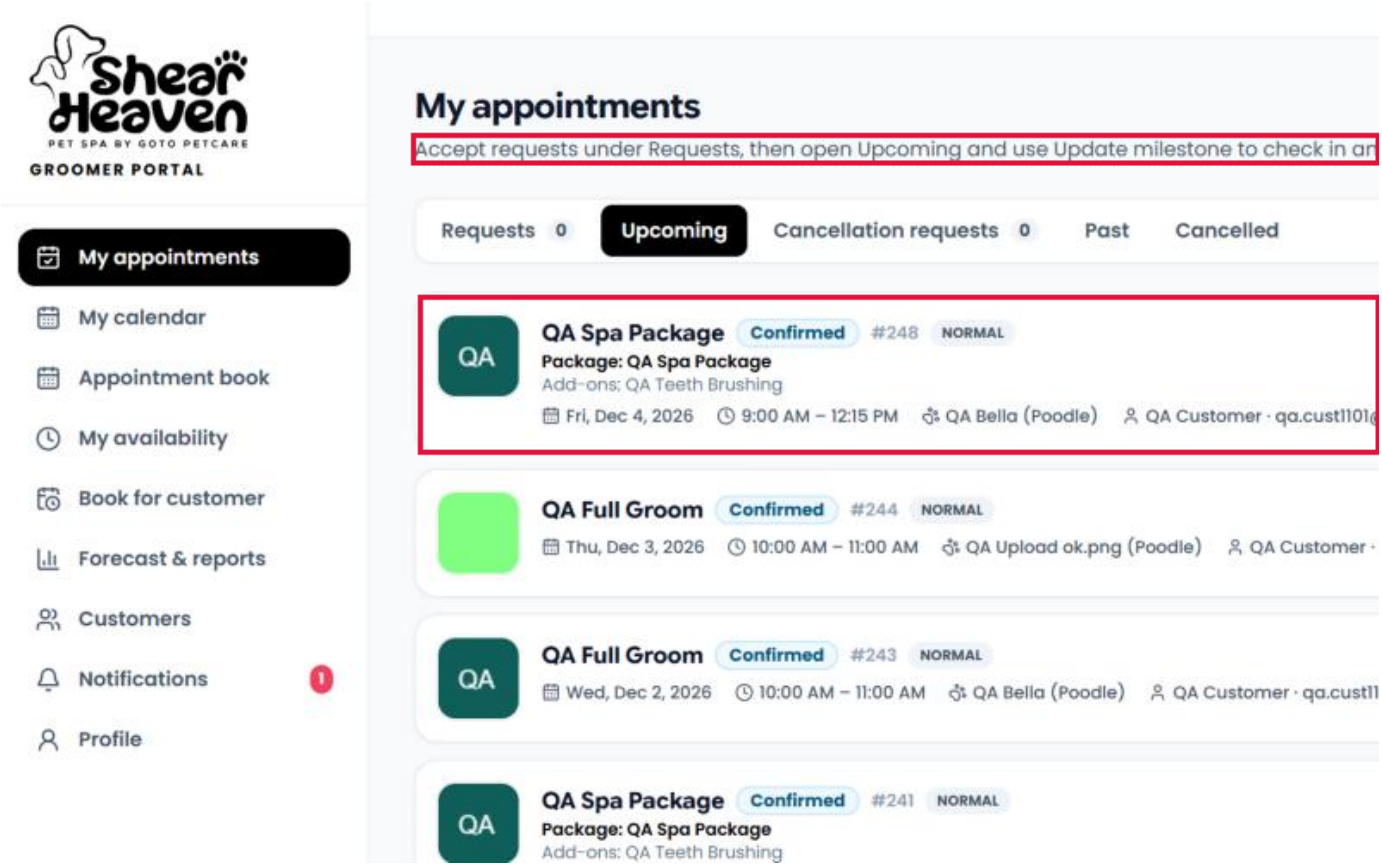

Mobile - grid scrolled; legend clipped, no time labels

UI-GR-03 - Page instructions refer to an 'Update milestone' button that is not shown on any card

Bug ID	UI-GR-03	Severity	Medium
Page / Section	Groomer portal - My appointments - Upcoming	Viewport(s)	Desktop 1440x900; Tablet 768x1024; Mobile 375x812

Steps to reproduce	1. Log in at https://pcmdev.shearheavenpetspa.com/login as groomer QA Alpha (qa.alpha@shearheaven.local). 2. On My appointments, read the subtitle. 3. Open the Upcoming tab.
Actual result	Subtitle says 'open Upcoming and use Update milestone to check in and move through each service step', but Upcoming cards (including today's in-progress visits) show no buttons at all - no 'Update milestone', no 'Check in' - and the cards are not clickable.
Expected result	Either the cards show the action the instructions describe, or the instruction text is updated to describe where milestones are updated (e.g. Appointment book).

Evidence

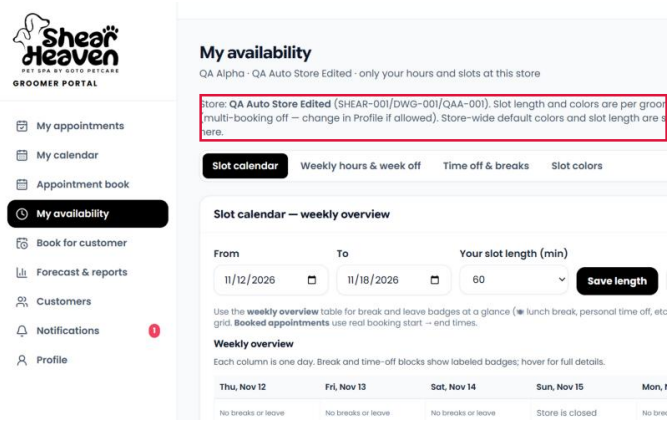

Desktop - Upcoming cards without actions

UI-GR-04 - Internal technical text and raw codes shown to groomers

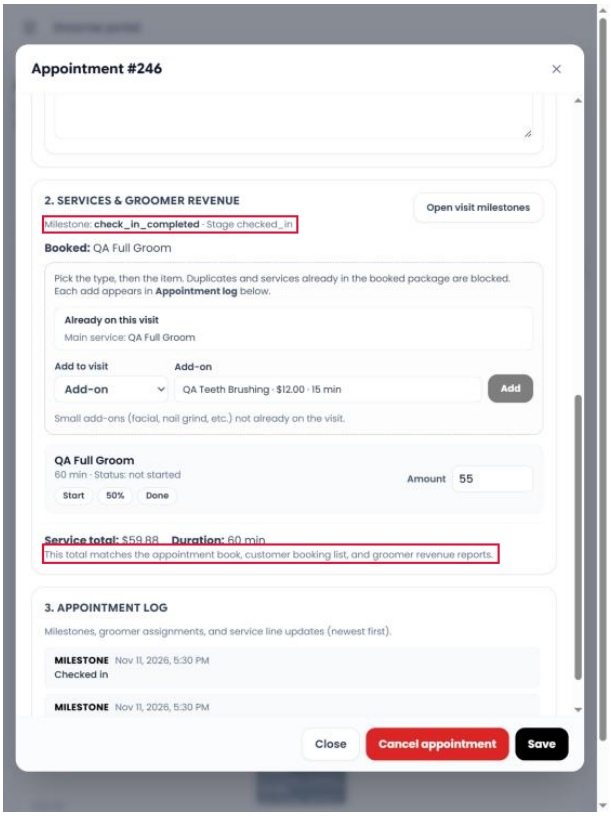

Bug ID	UI-GR-04	Severity	Low
Page / Section	Groomer portal - My availability / Appointment details	Viewport(s)	Desktop 1440x900; Tablet 768x1024; Mobile 375x812

Actual result	Availability shows '(SHEAR-001/DWG-001/QAA-001)' and the database table name '(groomer_store_availability)'. The appointment modal shows 'Milestone: check_in_completed - Stage checked_in' (snake_case codes) and a developer note 'This total matches the appointment book, customer booking list, and groomer revenue reports.'
Expected result	Only user-facing wording (e.g. 'Milestone: Checked in'); no tenant IDs, table names or developer notes.

Tablet - appointment modal

UI-GR-05 - Broken pet photos show the browser's broken-image icon with no fallback

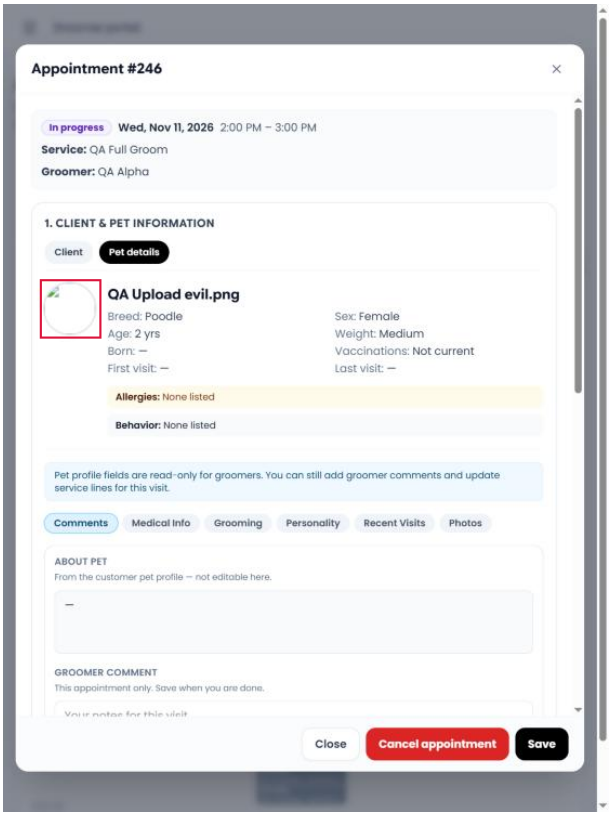

Bug ID	UI-GR-05	Severity	Low

Actual result	Pets whose photo fails to load (e.g. 'QA Retest evil.png', 'QA Upload evil.png') show an empty frame with the browser's broken-image icon; no alt text or initials placeholder.
Expected result	A consistent fallback avatar (initials or paw icon) when a pet photo cannot be displayed.

UI-GR-06 - Empty white header bar above every page on desktop

Steps to reproduce	1. Log in at https://pcmdev.shearheavenpetspa.com/login as groomer QA Alpha (qa.alpha@shearheaven.local). 2. View any groomer page at 1440 px width.
