S.No	Issue Title	Module	Expected Result	Actual Result
1	Appointment Details Are Visible Across Different Groomer Accounts	Groomer Login – Appointment Details	Appointment details entered for one groomer should be visible only to the assigned groomer. Other groomer accounts should not display another groomer's appointment details.	Details entered for one groomer are also displayed when logging in with a different groomer account.
2	Groomer Can Edit Customer-Entered Details	Groomer Login – Appointment Details	Customer-provided details should be displayed to the groomer for reference and should not be editable unless the field is explicitly intended for groomer updates.	The groomer can edit details entered by the customer.
3	Previously Added Add-On Can Be Added Again Through Package Selection	Groomer Login – Package / Add-Ons	An add-on already added to the appointment should not be available for duplicate selection or addition through the package.	An add-on that was already added can be added again when selecting the package.
4	Duplicate Nail Grind Service Prevents Milestone Update	Groomer Login – Services / Milestones	Nail Grind should appear only once unless multiple units were intentionally selected. The groomer should be able to update the related milestone successfully.	Nail Grind is displayed twice (including 'Nail Grind 02 times'), and the duplicate entry prevents the milestone from being updated.
5	Groomer Can Edit Customer Details in Client Details Section	Groomer Login – Client Details	Customer/client details should be read-only for groomers unless specific fields are explicitly authorized for editing.	The groomer is able to edit the details displayed in the Client Details section.
6	Print Action Opens a Blank Page	Groomer Login – Appointment Print	Clicking Print should open a properly formatted, printable appointment summary with the relevant appointment and customer details.	Clicking Print opens an about:blank page instead of displaying the appointment details.
