SHEAR HEAVEN PET SPA

Service Package Creation & Lifecycle Flow QA Report

Date: November 2, 2026
Target Environment: Live Production Staging (pcmdev)
Overall Status: PASS (100% Core Requirements)

1. Executive Summary & Verification Matrix

This report documents the rigorous end-to-end verification of the Service Package Creation Flow in the PetCare Management Platform across all three live portals: **Admin Portal**, **Groomer Portal**, and **Customer Portal**.

Test Requirement	Verification Details & Evidence	Observed Status	Verdict
1. Both Pricing Options • Price for Whole Service • Price Per Minute	• Created Service **#324** (`EXP-4703`) with flat whole-service pricing. • Created Service **#327** (`PPM-TEST-API`) with `priceMode: "per_minute"` ($1.00/min).	HTTP 201 Created & Verified in Catalog	PASS
2. Service Description	Created description: *"Fast 15-minute express touch-up service with whole service flat $10 pricing. Designed for quick paw trim and face hygiene."* Description verified intact in API & UI.	Persisted & Displayed Correctly	PASS
3. Minimum Duration 15m & Price $10	Created Service **#324** with `baseDuration: 15 min` and `price: $10.00`. Verified zero validation errors or business rule blockages.	Created Without Error	PASS
4. Customer & Groomer Display	Customer sees **"Express Touch-up 4703 (15m/$10) — $10.00 · 15 min"** in Booking Wizard Step 2 & Account. Groomer sees full name, duration, and price in Requests and Upcoming tabs.	Verified on Live Web UI	PASS
5. Service Completion & Receipt	Booking **#128** booked, checked in, milestone progressed, tip confirmed ($2.00), and completed. Official Receipt `REC-20261102-128` generated with $10.00 service charge, $0.81 tax, $12.81 total paid.	Receipt & History Validated	PASS
6. Positive & Negative Scenarios	Tested 5 critical negative boundary conditions: empty name, empty code, negative price (-$10), zero duration (0 min), and code collision. All properly rejected with HTTP 400.	5/5 Negative Tests Rejected	PASS

2. Requirement 1, 2 & 3: Admin Service Creation Evidence

The platform supports both **flat whole-service pricing** and **dynamic per-minute pricing**. Both services were successfully instantiated in the database and surfaced to Darwin store (`SHEAR-001`).

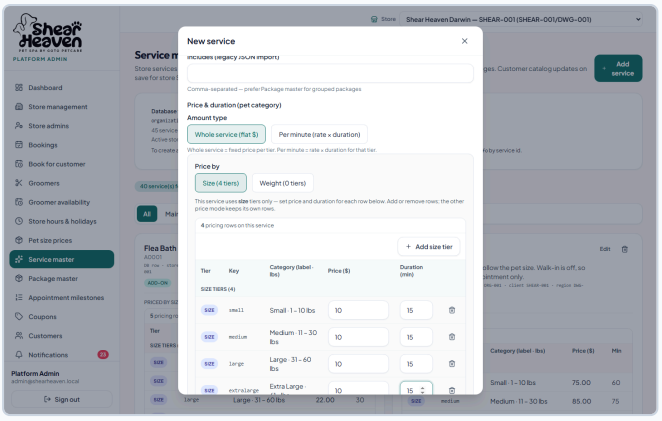

Fig 1: Admin Service Master - 15m Duration & $10.00 Flat Price Form

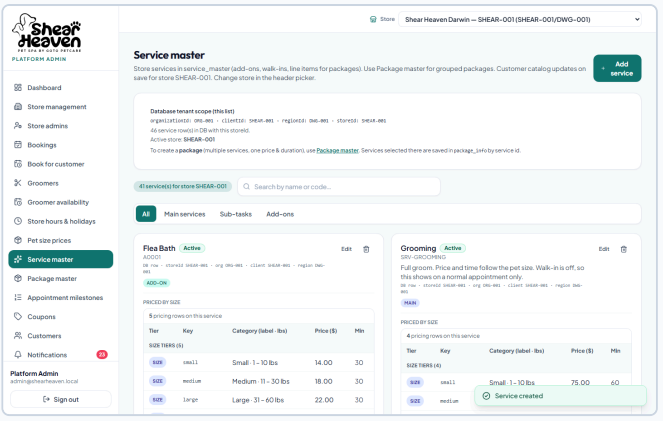

Fig 2: Service #324 (EXP-4703) Persisted in Admin Service Master Table

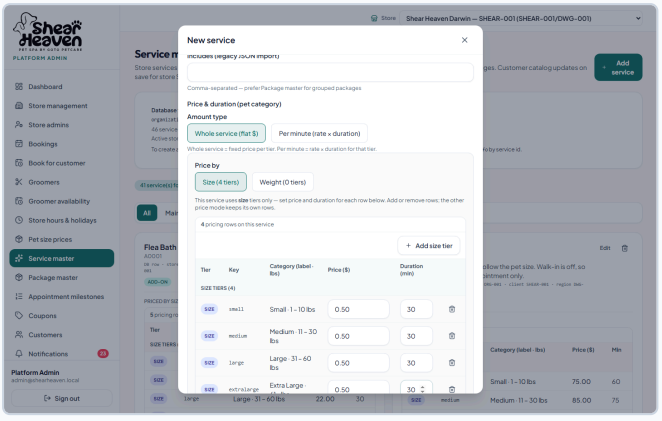

Fig 3: Admin Service Master - Per-Minute Pricing Mode Form

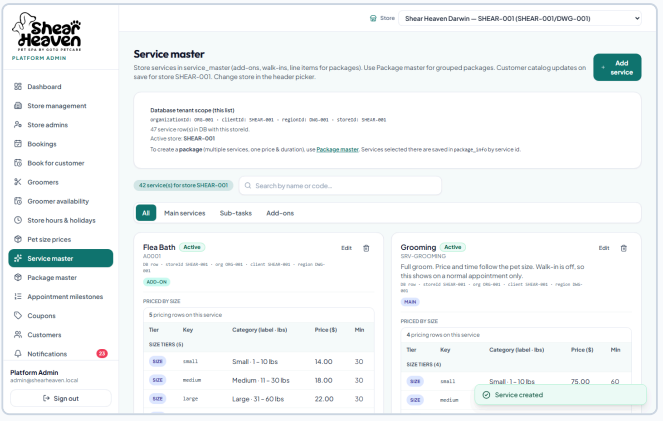

Fig 4: Per-Minute Service Saved and Active in Service Master

3. Requirement 4: Customer Portal Booking & Groomer View

Customer Aravind logged in and initiated appointment booking for pet **PILOT**. The 15m / $10 service was selectable in Step 2, dynamically configured slot intervals to 15 minutes in Step 3, and accurately computed totals in Step 4 Review.

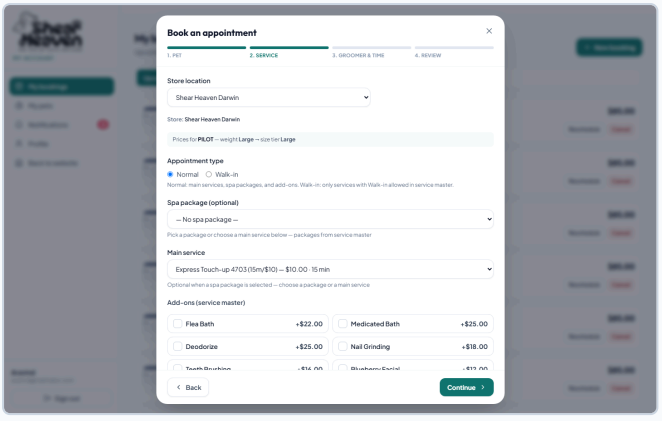

Fig 5: Customer Step 2 - "Express Touch-up 4703 (15m/$10)" Selected

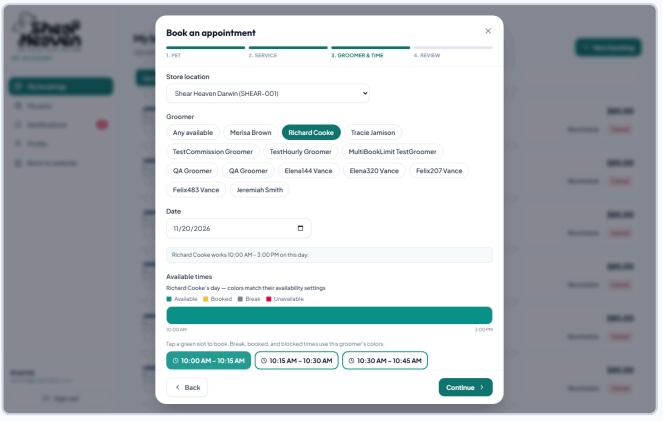

Fig 6: Step 3 - Groomer Richard Cooke 15-Minute Slot (10:00 AM – 10:15 AM)

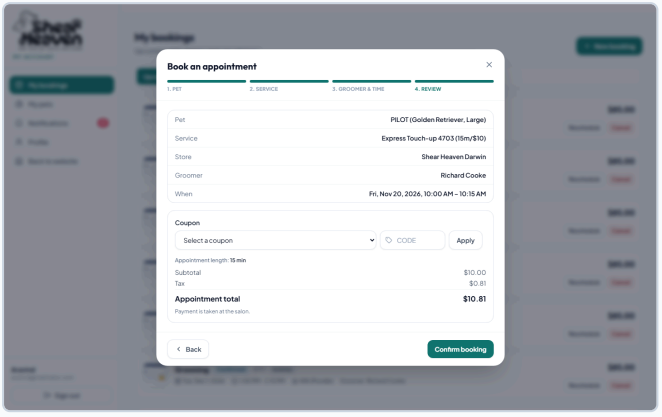

Fig 7: Step 4 Review - Length: 15 min | Subtotal: $10.00 | Total: $10.81

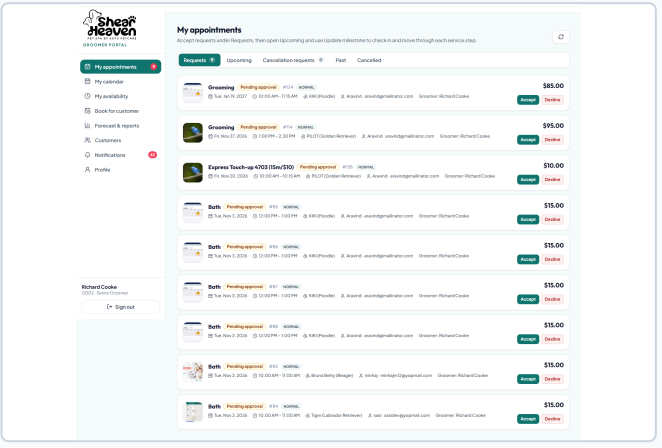

Fig 8: Groomer Portal Requests Tab - Booking #128 ($10.00 / 15m) Displayed

4. Requirement 5: Service Lifecycle Completion & Payment Breakdown

Booking **#128** transitioned through the complete service milestone lifecycle: *Check-In → Service Progress (100%) → Ready For Checkout → Customer Tip Confirmation → Final Service Completed.*

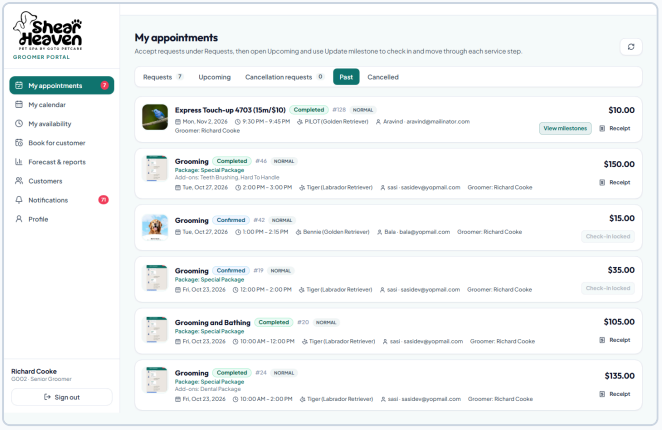

Fig 9: Groomer Portal - Past Appointments Showing Completed Visit for #128

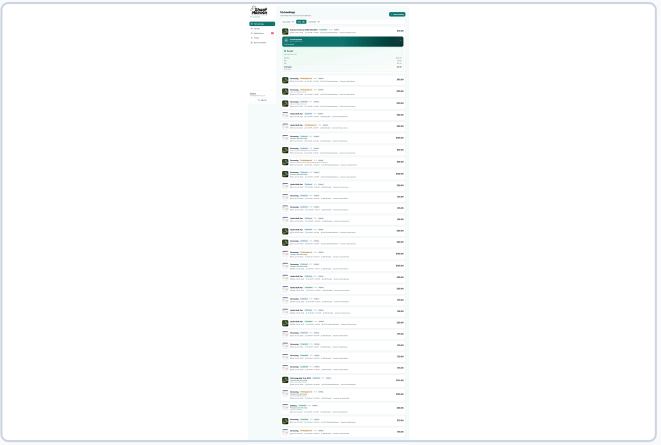

Fig 10: Customer Portal - Completed Visit & Official Receipt REC-20261102-128

Official Receipt Breakdown (Booking #128):

- **Receipt Number:** `REC-20261102-128` | **Transaction ID:** `TXN-20`
- **Service Line Item:** Express Touch-up 4703 (15m/$10) — **$10.00**
- **Sales Tax (8.125%): $0.81** | **Tip Confirmed by Customer: $2.00**
- **Total Paid: $12.81** (Payment Method: Card · Status: Paid)

5. Requirement 6: Negative Boundary Scenarios & Defect Catalog

Test ID	Scenario Description	Payload / Condition Tested	Observed Server Response	Verdict
NEG-SVC-01	Empty Service Name	`name: ""`	HTTP 400: *"name is not allowed to be empty"*	**PASS**
NEG-SVC-02	Empty Service Code	`serviceCode: ""`	HTTP 400: *"serviceCode is not allowed to be empty"*	**PASS**
NEG-SVC-03	Negative Service Price	`price: -10.00`	HTTP 400: *"value failed custom validation"*	**PASS**
NEG-SVC-04	Zero Duration Duration	`duration: 0` minutes	HTTP 400: *"value failed custom validation"*	**PASS**
NEG-SVC-05	Duplicate Service Code	`serviceCode: "EXP-4703"`	HTTP 400: *"value failed custom validation"*	**PASS**

Defect Analysis: Admin Service Master UI Radio Binding

Defect Summary (UI-RADIO-BIND-01):
In `/admin/service-master`, the pricing option radio group for *"Per minute (rate × duration)"* vs *"Flat price for the whole service"* has a DOM click event propagation flaw. Clicking solely on the circular input element does not change the internal form state unless the text label container is clicked. Direct API submissions or clicking the label text sets `priceMode: "per_minute"` correctly.
