

		EXPECTED RESULT	ACTUAL RESULT
	bug - In Chat Admins , Supervisors , Customer Representatives Full name accept only special characters Module: uatchatadmin → users → Chat Admins , Supervisors , Customer Representatives -> Add New	The Full Name field should validate the input and should not allow a name containing only special characters.	The field accepts a value containing only special characters, for example: #@@@\$\$#%\$%^%&&^&^*^*
	bug 2 - In Edit profile Full name accept only special characters Module: uatchatadmin → profile -> edit profile Issue: The Full Name field accepts special characters without any validation	The Full Name field should validate the input and should not allow a name containing only special characters.	The field accepts a value containing only special characters, for example: #@@@\$\$#%\$%^%&&^&^*^*
	bug - Phone Number and profile picture field Validation Error Not Clearing Module: uatchatadmin → profile -> Chat Admins , Supervisors , Customer Representatives -> add new	The validation error should be cleared immediately once a valid 10-digit phone number is entered and choose profile picture. Priority: Minor / UI Bug	When a user enters less than 10 digits in the phone number field and without profile picture then submits, the validation error is displayed and submission is blocked. After entering a valid 10-digit phone number and choose profile picture, the error message remains displayed even though the form can be successfully submitted.
	Bug 4 - Missing Heading for Supervisor and Chat Admin Fields Module: uatchatadmin → users-> Chat Admins , Supervisors , Customer Representatives -> add new	Display clear headings such as “add Supervisor” and “add Chat Admin” above the respective sections to help users understand the fields.	When opening the Add New form for Chat Admin/Supervisor, the respective section heading is blank/missing.
	Bug 5 - Chat Admin Required Validation Not Triggered on Supervisor Update Module: uatchatadmin → users-> Supervisors -> Action-edit	Since Chat Admin is a required field, the system should display a validation error and prevent the Supervisor update when the field is blank.	A Supervisor is created with a Chat Admin assigned. If the assigned Chat Admin is later deleted, the Supervisor's Chat Admin field becomes blank in Edit mode. However, clicking Save Changes successfully updates the Supervisor without showing the required-field validation error.
	chat --> representative dashbord --> private chat --> When initiating a private chat, the chat session is displayed as ***“Chat Session Ended,”*** and the users are unable to continue the chat. Additionally, when the representative added to the private chat sends a message, the message is not delivered as a private message.	When a Private Chat is initiated, the chat session should remain active, allowing users to continue the conversation. Messages sent by the representative added to the private chat should be delivered only within the private chat to the intended participants.	When initiating a Private Chat, the chat session is displayed as “Chat Session Ended.” Users are unable to continue the private chat. When the representative added to the private chat sends a message, the message is not delivered as a private message.
