

				EXPECTED RESULT	ACTUAL RESULT
09/09/2026	CH-1392	Others	Supervisor dashboard and chat admin dashboard --> private chat --> After adding a representative for a private chat, the chat page disappears. When the page is reloaded, the chat page appears again briefly but disappears immediately	In both the Supervisor Dashboard and Chat Admin Dashboard, the private chat page should remain displayed after adding a representative and should not disappear or require a page reload	In both the Supervisor Dashboard and Chat Admin Dashboard, after adding a representative for a private chat, the chat page disappears. When the page is reloaded, the chat page appears briefly but disappears again immediately.
09/09/2026	CH-1382	Others	Customer representative dashboard --> Private Chat, Delegate Chat, and Group Chat buttons are not working	In Customer representative dashboard , The Private Chat, Delegate Chat, and Group Chat buttons should work as expected when clicked and should open the respective chat functionality/page.	In Customer representative dashboard , The Private Chat, Delegate Chat, and Group Chat buttons are not working when clicked. No action is performed, and the respective chat functionality does not open.
09/09/2026	CH-1392	Others	Doctor dashboard --> private chat --> While initiating a private chat, the Active Chat Session should display the doctor's name and the representative's name who was added to the private chat. Currently, the doctor's name is displayed twice instead of showing the representative's name.	In Doctor Dashboard → Private Chat, the Active Chat Session should display both the doctor's name and the representative's name who was added to the private chat.	In Doctor Dashboard → Private Chat, when a private chat is initiated, the doctor's name is displayed twice in the Active Chat Session instead of displaying the doctor's name and the representative's name.
