| Issue Title |
| --- |
| Appointment details modal header is misaligned / UI issue |
| New Booking form opens automatically after closing appointment details |
| Groomer filter defaults to All Groomers instead of the logged-in groomer |
| Appointment cards and dates overflow during horizontal scrolling |
| Last appointment card hover details panel is clipped at the bottom |

| Steps / Scenario |
| --- |
| Open an appointment from the Appointment Book. |
| Open an existing appointment to view its details, then close the appointment details view. |
| Log in to the Groomer Portal using a groomer account and open Appointment Book. |
| Open Appointment Book and scroll horizontally across the calendar grid. |
| Scroll to the last appointment card near the bottom of the visible calendar area and hover over it to display its details. |
| |

| Actual Result |
| --- |
| The appointment details modal/header area is not displayed correctly; the top portion appears clipped or misaligned as highlighted in the screenshot. |
| The New Appointment / New Booking form is displayed automatically after closing the appointment details view. |
| The groomer filter defaults to 'All groomers', even though a specific groomer is logged in. |
| Appointment cards and date columns move/overflow beyond the intended calendar boundaries, as highlighted in the screenshot. |
| The hover details panel opens downward and extends beyond the visible area, causing the lower details to be cut off. |
| |

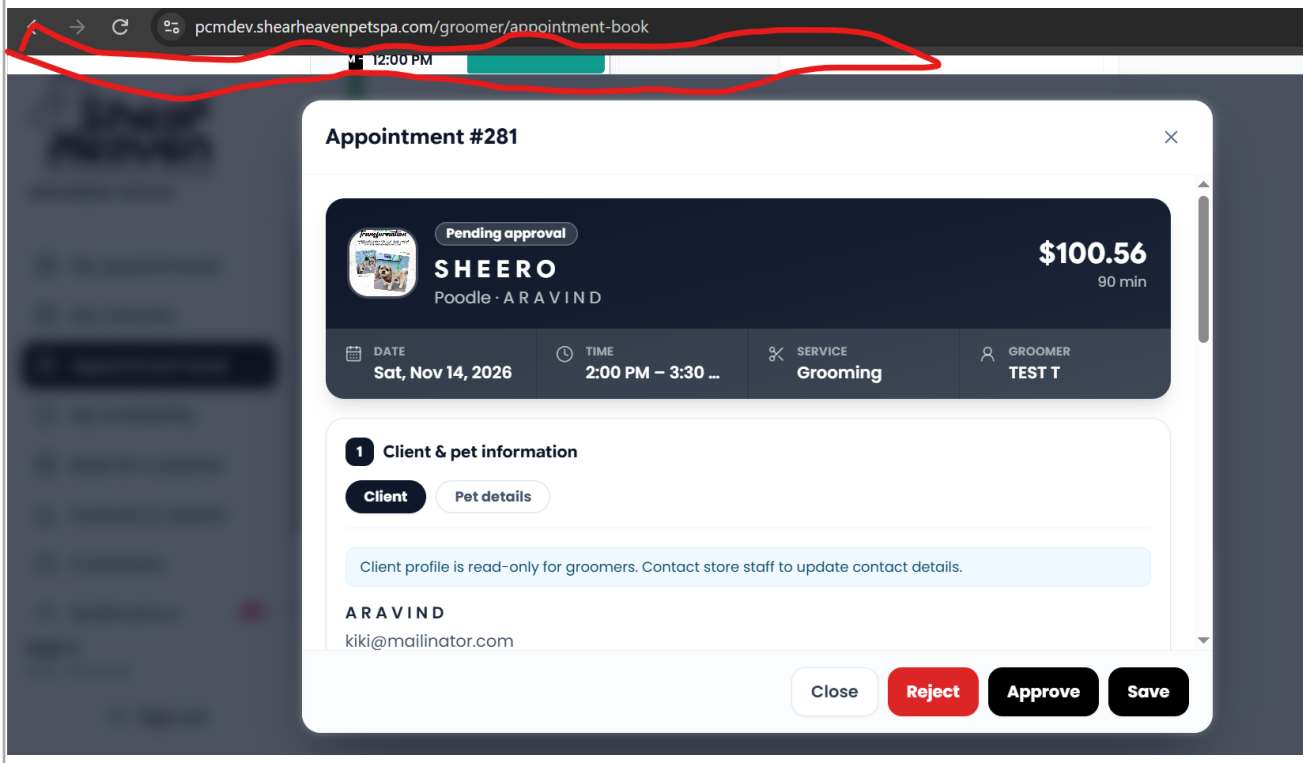

| Expected Result | Suggested Priority |
| --- | --- |
| The appointment details modal and its header should be displayed cleanly, without clipping, overlap, or alignment issues. | Medium |
| Closing the appointment details view should return the user to the Appointment Book. The New Booking form should open only when the user explicitly selects New Booking. | High |
| The groomer filter should default to the currently logged-in groomer. 'All groomers' should be available only when the user's role/permissions allow it or when selected manually. | High |
| Horizontal scrolling should keep appointment cards aligned within their corresponding date columns and calendar area. Cards and date headers should not spill outside the layout. | Medium |
| When there is insufficient space below the last card, the hover details panel should open upward (above the card) or reposition itself so that all details remain visible within the viewport. | Medium |
| | |
