GROOMER AVAILABILITY – FRONTEND UI & FUNCTIONAL DEFECTS REPORT

Comprehensive Analysis of Customer Portal Wizard, Groomer Availability UI, Button States & Calendar Display

TARGET ENVIRONMENT	STORE & STYLIST	TOTAL UI DEFECTS FOUND	TEST DATE
PCMDEV Production / Staging	Darwin (SHEAR-001) / Richard Cooke (ID: 2)	4 Verified Frontend Issues	November 04, 2026

EXECUTIVE SUMMARY & UI HEALTH STATUS: Rigorous UI testing of the Customer Portal and Groomer Portal revealed **4 major visual, functional, and accessibility defects**. The most severe issue occurs in the Customer Booking Wizard (Step 3), where morning time-off blocks the entire afternoon schedule from customer selection, displaying valid working hours as disabled bright red buttons. In addition, midday breaks cause valid afternoon slots to vanish from the UI, and weekly hours toggle buttons lack native form accessibility bindings.

UI BUG 01 — Customer Portal Completely Blocks Valid Afternoon Slots Due to Faulty timeSlotChoices Rendering

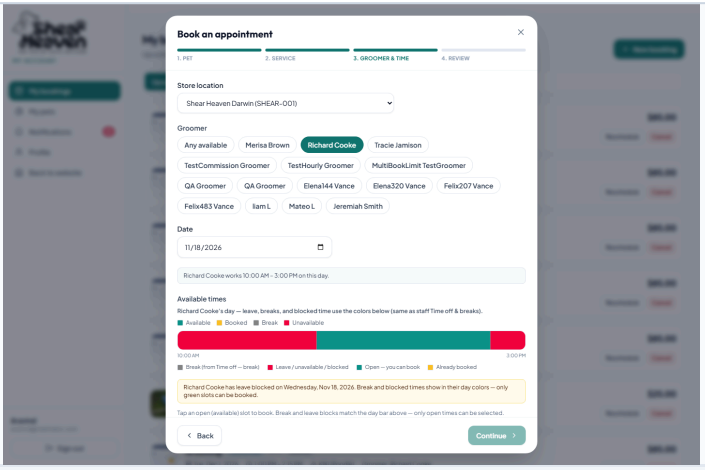

CRITICAL

Module: Customer Portal → New Booking Wizard → Step 3

Date Tested: 2026-11-18 (Wednesday)

Configured Hours: 10:00 - 15:00 (Time Off: 10:00 - 12:00)

EXPECTED RESULT	ACTUAL RESULT
While slots between 10:00 AM and 12:00 PM should be disabled/blocked due to approved leave, open afternoon slots (12:00 PM – 1:15 PM, 1:15 PM – 2:30 PM) must be displayed as available, selectable teal/green buttons (`computedCursor: "pointer"`).	The wizard rendered **100% of slot buttons as disabled and bright red** (`background-color: rgb(244, 1, 62); cursor: not-allowed; opacity: 0.95`). Afternoon slots (12:30 PM – 1:45 PM, 1:45 PM – 3:00 PM) were completely locked, preventing any customer from booking the open afternoon.

Evidence UI Bug 01: Customer Portal Step 3 on 2026-11-18. All four slot buttons are rendered red and disabled (cursor: not-allowed), completely locking out the customer despite open afternoon working hours (12:00 - 15:00).

UI BUG 02 Break Time Slicing Suppresses Valid Afternoon Slots in Customer Wizard

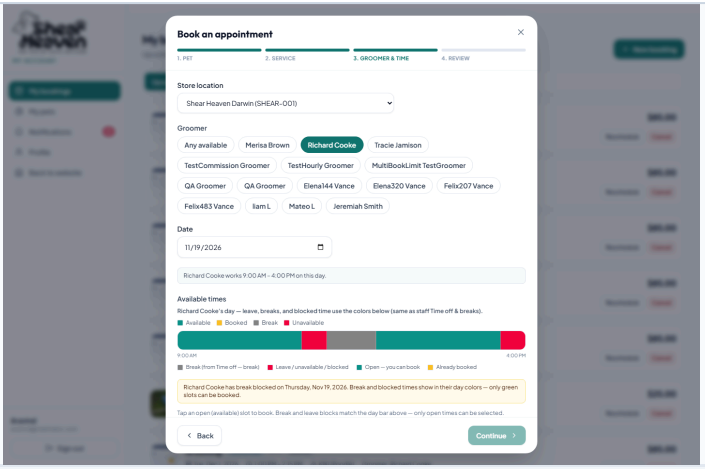

HIGH

Module: Customer Portal → New Booking Wizard → Step 3

Date Tested: 2026-11-19 (Thursday)

Configured Hours: 09:00 - 16:00 (Break: 12:00 - 13:00)

EXPECTED RESULT	ACTUAL RESULT
Morning slots (09:00 - 10:15, 10:15 - 11:30) and afternoon slots (1:00 PM – 2:15 PM, 2:15 PM – 3:30 PM) should both be available and bookable, while only the 12:00 - 13:00 break window is grayed out.	The 1:00 PM – 2:15 PM slot was completely missing from the UI buttons. The only afternoon button displayed was **2:00 PM – 3:15 PM**, which was rendered in bright red as disabled (`cursor: not-allowed`). The customer was left with zero selectable afternoon slots.

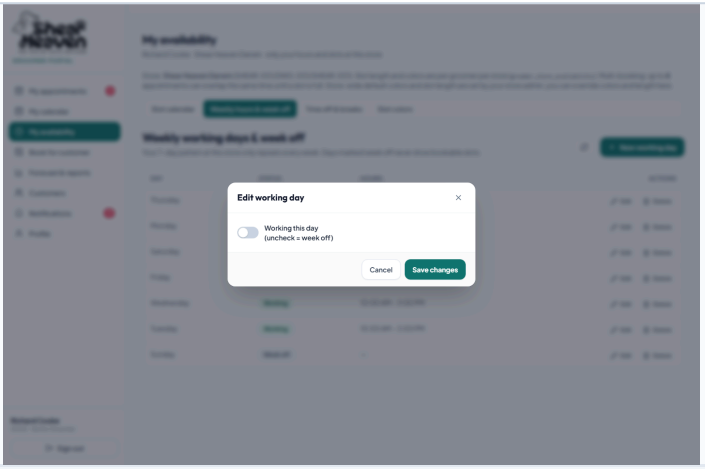

Evidence UI Bug 02: Customer Portal Step 3 on 2026-11-19. Morning slots are teal, break slots (11:30 & 12:45) are gray, but afternoon 2:00 PM slot is red/disabled, and valid 1:00 PM slot is missing entirely.

UI BUG 03 Weekly Working Day Toggle Control Lacks Standard Form Checkbox Semantics

MEDIUM

Module: Groomer Portal → Weekly Hours & Week Off → Edit Modal **Affected Component:** "Working this day (uncheck = week off)" Switch

EXPECTED RESULT	ACTUAL RESULT
The toggle should be implemented as an accessible switch or standard checkbox with clear visual feedback, synchronized `aria-checked`, and explicit "Working" vs "Week Off" text indicator next to the control.	The control is rendered as a standalone `<button type="button" role="switch">` without standard form bindings or clear toggle confirmation text. Users cannot immediately verify if the day was successfully marked as week off until after modal submission.

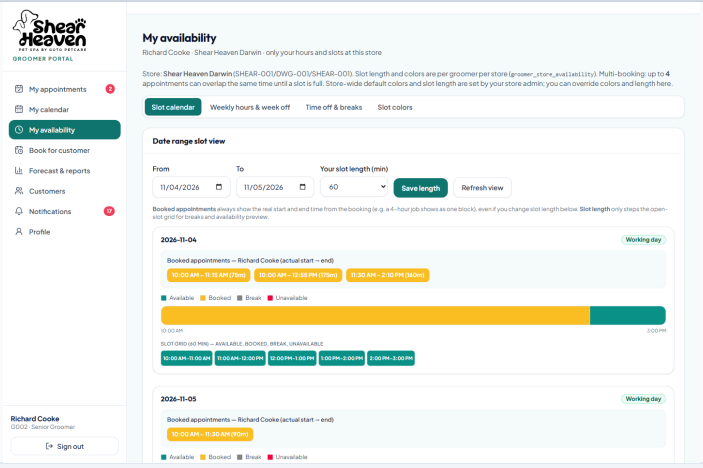

Evidence UI Bug 03: Edit Working Day modal displaying switch button control without form checkbox semantics or clear state feedback.

UI BUG 04 Groomer Slot Calendar Grid Fails to Display Break Badges and Partial Time-Off Labels

MEDIUM

Module: Groomer Portal → My Availability → Slot Calendar Tab **Tested Views:** Weekly Calendar Overview (Thursday & Friday)

EXPECTED RESULT	ACTUAL RESULT
When a groomer configures a midday break or partial time-off, the calendar column should display an informational chip or badge showing the break type and reason (e.g., "Break: Lunch Break 12:00 - 13:00").	The calendar grid merely displays blank, non-descript blocks without any chip, text, or tooltip indicating the break. The groomer has to leave the calendar and navigate to the "Time off & breaks" table to understand the schedule.

Evidence UI Bug 04: Groomer Slot Calendar displaying schedule columns without break label chips or partial time-off descriptive badges.
