

Bug Description	Expected	Actual
Representative dashboard --> complete chat --> private chat --> system display " this page could not be opened "	When I assign private chat to another representative after ending that chat when i see to in completed chat i cant open that chat its showing as This page could not be opened	This chat can be open
representative dashboard --> group chat --> When representatives are added to a Group Chat, the chat should be displayed on the respective representatives' dashboards as Group Chat, not Delegate Chat.	When I assign private chat that showing deligated chat in reciever side dashboard	That will show as private chat
representative dashboard --> active chat --> When representatives are added new doctor to a Chat, the chat should not display as deligated chat	When patient message newly assigned dr that time showing as deligated chat once i refresh the page that time showing correctly	in that case no need to show delicated
