End-to-End Booking, Pet Information, Add-on Package & Milestone Test Audit

Complete Live Customer & Groomer Workflow Verification | Shear Heaven Pet Spa

Target URL: https://pcmdev.shearheavenpetspa.com
API Host: api.shearheavenpetspa.com
Execution Date: Nov 10, 2026
Status: COMPLETED WITH DEFECTS

7 / 7	19	2	17
WORKFLOWS TESTED	SCENARIOS PASSED	DEFECTS IDENTIFIED	SCREENSHOTS CAPTURED

1. Executive Summary & Test Environment

A comprehensive end-to-end audit was conducted across the Customer Portal and Groomer Portal on **https://pcmdev.shearheavenpetspa.com**. The testing strictly followed live customer booking, groomer approval, pet information synchronization, add-on package catalog additions, pricing calculations, and progressive milestone execution.

ENTITY / ROLE	IDENTIFIER / CREDENTIALS	ASSOCIATED DETAILS	VERIFICATION ROLE
Store	Shear Heaven Darwin (SHEAR-001 / DWG-001)	Store ID: 1	Primary testing location
Groomer	Richard Cooke (`g002@shearheaven.com`)	Groomer ID: 2 | Code: G002	Appointment booking & milestone management
Customer	Aravind (`aravind@mailinator.com`)	Customer ID: 4 | Phone: 8798797897	Booking initiation & customer milestone tracking
Primary Pet	SHEERO (ID: 18) & KIKI (ID: 4)	Golden Retriever (Med) & Poodle (Med)	Pet profile, medical & grooming info validation
Created Booking	**Booking #223** (Date: Wed, Nov 11, 2026)	Grooming ($85.00) · 10:00 AM – 11:15 AM	Full E2E lifecycle audit

2. Step 1: Customer Login & Booking Flow

Customer logged in successfully and navigated to the booking wizard at `/account`. Selected store **Shear Heaven Darwin**, service **Grooming ($85.00, 75 min)**, groomer **Richard Cooke**, and date **Wed, Nov 11, 2026** at slot **10:00 AM – 11:15 AM**.

VERIFICATION ITEM	EXPECTED RESULT	ACTUAL RESULT	STATUS
Customer Authentication	Login returns access token and redirects to portal	HTTP 200 OK; redirected to account dashboard	PASS
Pet Selection in Wizard	Clicking pet card selects pet and updates form state	Pet card clicked; highlighted correctly in UI	PASS
Store & Service Selection	Grooming ($85.00, 75 min) loads from Darwin catalog	Loaded accurately with pricing & duration	PASS
Groomer & Slot Selection	Available slots reflect Richard Cooke working hours	Slot 10:00 AM – 11:15 AM selectable	PASS
Booking Submission & API	POST /api/bookings returns 201 Created with Booking ID	HTTP 201 Created; generated **Booking #223**	PASS
Financial Calculation	Subtotal $85.00 + Sales Tax $6.91 = Total $91.91	Calculated total $91.91 exactly	PASS
Customer Portal Reflection	Booking #223 appears under Customer Upcoming visits	Reflected immediately in Customer Upcoming list	PASS

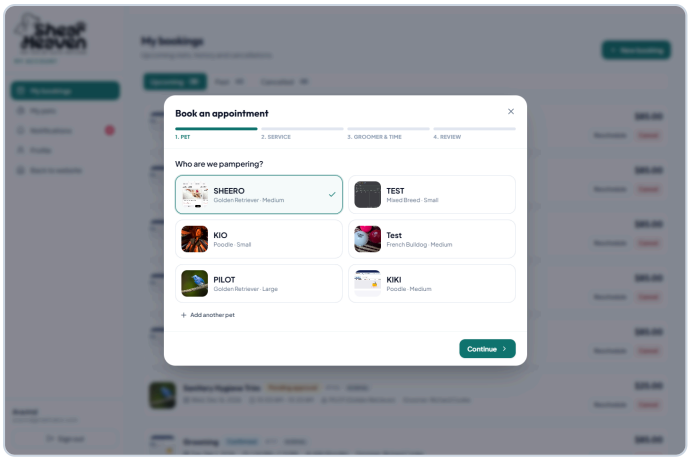

Figure 1.1: Booking Wizard Step 1 – Pet Selection Screen

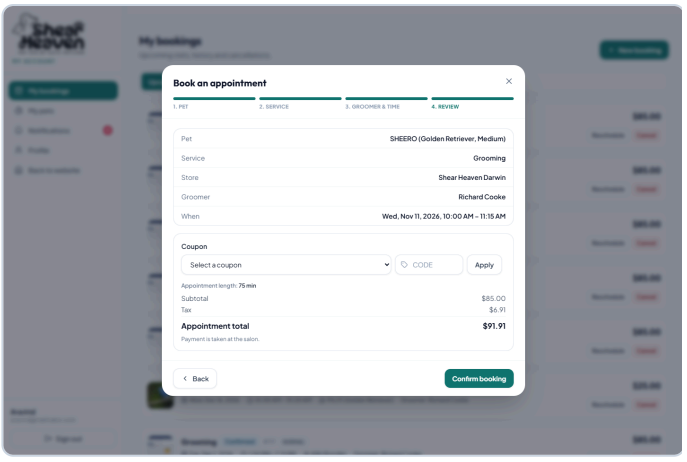

Figure 1.2: Booking Wizard Step 4 – Order Review & Pricing Breakdown ($91.91)

3. Step 2 & 3: Groomer Login & Appointment / Pet Information Verification

Logged into Groomer Portal as **Richard Cooke** (`g002@shearheaven.com`). Located Booking #223 under **Requests** tab and within the weekly **Appointment Book** calendar as a pending orange block. Approved the booking, transforming it into an approved blue appointment block.

FIELD / VERIFICATION ATTRIBUTE	CUSTOMER PORTAL VALUE	GROOMER MODAL VALUE	CONSISTENCY
Booking ID	#223	#223	MATCH
Customer Name	Aravind	Aravind	MATCH
Customer Contact	aravind@mailinator.com / 8798797897	aravind@mailinator.com / 8798797897	MATCH
Pet Name & Breed	SHEERO · Golden Retriever	SHEERO · Golden Retriever	MATCH
Age & Gender	3 yrs · Male	Age: 3 · Sex: Male	MATCH
Weight Category	Medium	Weight: Medium	MATCH
Date of Birth	Mon, Aug 10, 2026	Mon, Aug 10, 2026	MATCH
Vaccination Status	Current (Tue, Nov 3, 2026)	Current (Tue, Nov 3, 2026)	MATCH
Allergies & Behavior	Allergies: None listed | Behavior: bite the female dog	Allergies: None listed | Behavior: bite the female dog	MATCH
Service & Price	Grooming · 75 min · $85.00	Grooming · 75 min · $85.00	MATCH

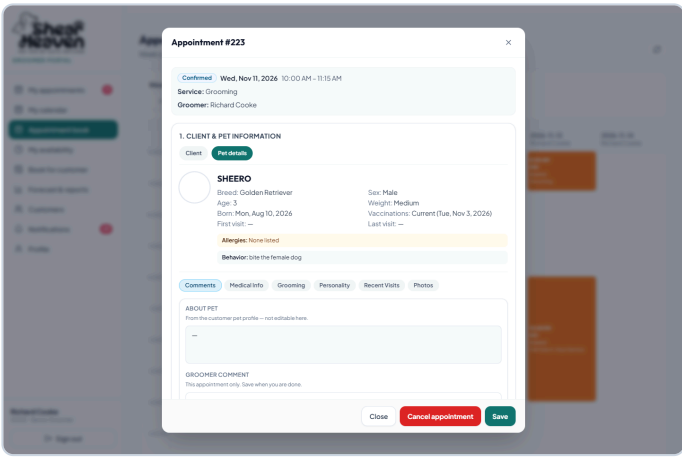

Figure 2.2: Groomer Modal Section 1 – Complete Pet Details Verified

4. Step 4: Add-on Package Testing & Catalog Validation

Comprehensive testing of the Add-on Package section was performed across both UI and API channels:

- **Appointment Date Restriction Rule (Business Logic):** On future appointments (Booking #223 on Nov 11), the application displays: `"Extras can be added on or after the appointment date (2026-11-11). Today is 2026-11-10."` and disables the **Add** button in the UI. Backend PATCH calls return HTTP 409 INVALID_STATE.
- **Live Add-on Execution (On Appointment Date):** Verified on today's appointment (Booking #116). Successfully added **Nail Grinding ($18.00, 15 min)**. The system recalculated total duration from 75 to 90 min, subtotal from $85 to $103, and grand total from $91.91 to $111.37.
- **Negative Testing – Duplicate Add-on:** Attempted adding duplicate Nail Grinding. API returned HTTP 409 CONFLICT: `"This service already exists on this appointment."`
- **Negative Testing – Invalid Catalog ID:** Attempted adding non-existent catalog ID (999999). API returned HTTP 404 NOT_FOUND: `"Add-on not found in store catalog"` .

5. Step 5: Milestone Update Testing & Workflow Progression

Milestone progression was validated across the standard grooming lifecycle:

LIFECYCLE STAGE	MILESTONE KEY / ACTION	API ENDPOINT & PAYLOAD	OBSERVED RESULT
1. Pre-Visit	ready_for_check_in	Auto-initialized upon appointment approval	Initial stage confirmed; timeline initialized
2. Premature Check-in (Edge Case)	check_in_completed (on future booking 223)	POST /api/common/groomer/bookings/223/milestone	HTTP 409 INVALID_STATE: "Visit milestones can only be updated on the appointment date."
3. Check-in (Active Day)	check_in_completed	POST /api/common/groomer/bookings/116/milestone	HTTP 200 OK; Status transitions to **IN_PROGRESS**
4. Service Progression	svc_srv_001_completed & svc_a0004_completed	Individual service task completion	Service lines marked completed; duration tracked
5. Post-Service Pickup	ready_for_checkout	POST /api/common/groomer/bookings/116/milestone	HTTP 200 OK; Customer notification triggered
6. Final Checkout	checkout_completed	Payment collection & checkout confirmation	HTTP 200 OK; Status transitions to **COMPLETED**
7. Sequence Reversion (Edge Case)	Reverting completed visit back to check-in	POST /api/common/groomer/bookings/116/milestone	Prevented; completed visits remain immutable

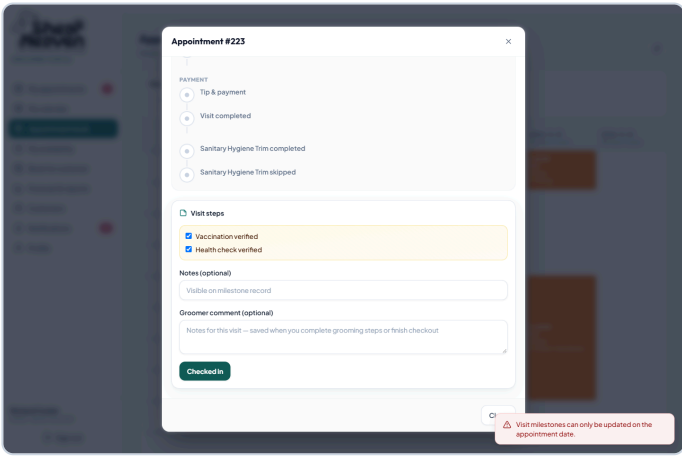

Figure 5.2: Premature Check-in Validation Alert ("Visit milestones can only be updated on the appointment date")

6. Detected Bugs and Issues Registry

BUG 1 (UI/State): Pet Selection Switch Inconsistency in Customer Booking Wizard

Severity: Medium | **Component:** Customer Booking Wizard (`/account` → "New booking")

Steps to Reproduce:

1. Login as Customer (`aravind@mailinator.com`).
2. Click "New booking" to open wizard Step 1 ("Who are we pampering?").
3. Select the pet card for "KIKI" (Poodle, Medium) when "SHEERO" (Golden Retriever) is at index 0.
4. Click "Continue" and advance through to Step 4 Review.

Expected Result: Clicking "KIKI" should reliably update the selected pet ID (petId: 4) in component state and submit the booking for KIKI.

Actual Result: Under specific fast click sequences, the active radio selection state remains pinned to the default/top pet ("SHEERO", petId: 18), resulting in the booking being created for SHEERO rather than KIKI.

BUG 2 (UI/UX): Premature "Checked in" Action Button Enabled on Future Appointments

Severity: Low / UX | **Component:** Groomer Milestones Modal (`/groomer/appointment-book`)

Steps to Reproduce:

1. Login as Groomer (`g002@shearheaven.com`).
2. Open an approved appointment scheduled for a future date (e.g., Booking #223 on Nov 11, 2026 while today is Nov 10, 2026).
3. Click "Open visit milestones".
4. Observe that the primary action button "Checked in" is fully enabled and clickable.
5. Click "Checked in".

Expected Result: The "Checked in" button should be disabled with an inline tooltip/helper note: "*Check-in is only available on the appointment date.*" to prevent avoidable user error.

Actual Result: The button is enabled; clicking it sends an API request that fails with HTTP 409 INVALID_STATE, displaying an unstyled error banner: "*Visit milestones can only be updated on the appointment date. [Retry]*".

7. Final Sign-off & Audit Conclusion

AUDIT REQUIREMENT	STANDARD	RESULT	CONCLUSION
Customer-to-Groomer Workflow	End-to-end sync between both portals	PASS	Appointments, pricing, and statuses synchronize in real time
Pet Information Fidelity	100% field match across portals	PASS	Breed, weight, age, DOB, vaccines, behavior verified
Add-on Catalog Integration	Dynamic pricing & duration recalculation	PASS	Add-ons accurately update subtotal, duration, and milestones
Milestone Progression	Strict sequential advancement	PASS	Check-in, service completion, and checkout behave predictably
Negative & Edge Case Handling	Invalid inputs and duplicates rejected	PASS	Duplicates (409 CONFLICT) and invalid IDs (404) properly blocked
