| Issue ID | Issue Title | Expected Result | Actual Result |
|---|---|---|---|
| SH-001 | Phone Number Field Does Not Enforce Validation | Phone number fields should accept only valid phone numbers and enforce the configured minimum/maximum length. Invalid or excessively long numbers should be rejected with a clear validation message. | The Vet Home Phone, Vet Mobile, and Vet Work Phone fields accept excessively long numeric values without displaying a validation message. |
| SH-002 | Name Field Does Not Enforce Validation | The name field should validate the entered value and reject invalid input, such as numbers or unsupported special characters, according to the application's name-field rules. | Name-field validation is not being enforced. Invalid name input is not appropriately prevented or flagged. |
| SH-003 | Age Does Not Match the Entered Date of Birth | The displayed age should be calculated correctly from the selected date of birth, and both values should remain consistent. | The Date of Birth is displayed as 08/01/2026, but the Age field displays 3 years. The displayed age and date of birth are inconsistent. |
| SH-004 | Groomer Login Intermittently Shows Invalid Credentials | A groomer should be able to log in consistently using valid registered credentials. | During groomer login, the application intermittently displays the error message 'Invalid email or password' even when the registered credentials are entered. |
