EXPECTED RESULT	ACTUAL RESULT	STEPS
After logging in, clicking the application logo should navigate the user to the appropriate home page without logging them out.	After logging in, clicking the application logo causes the user to be signed out unexpectedly.	Sigin (as groomer) -->Click the logo
When a customer completes check-in, the groomer should receive an updated notification on the Notification page.	After the customer checks in, no updated notification appears on the Notification page.	Signin (as customer) --> Book --> notifcation page Signin (as groomer) --> update the status of the pet
After booking an appointment, the Live Visit Progress section should load the appointment details and check-in status without any API connection errors.	Sometimes, after booking an appointment, the Live Visit Progress section displays the following error: Cannot reach the API at https://api.shearheavenpetspa.com. Start PetCareServer (port 3465) and check VITE_API_BASE_URL in shear_heaven_web/.env. As a result, the live visit progress details may not load correctly.	Signin (as customer) --> Book -->upcoming
The user should be able to reschedule an existing appointment by selecting a new date and an available time slot without encountering errors.	When attempting to reschedule an appointment, the system displays the error “Service 6 not found” and shows “No open slots,” preventing the user from proceeding with the rescheduling process.	Signin (as customer) --> Book -->upcoming --> Reschedule
