4. Defects & Discrepancies Catalog with Attached Evidence

BUG 1: Groomer Forecast Report Omits Coupon Discount and Overstates Line Service Amount

- **Location:** Groomer Portal → Forecast & Reports (`/groomer/forecast` & `GET /api/common/groomer/forecast`)
- **Actual Value:** Line item `serviceAmount: $95.00` | `completed.serviceAmount: $95.00`
- **Expected Value:** `serviceAmount: $85.50` (reflecting the 10% coupon deduction)
- **Impact:** Groomers see the gross undiscounted service amount rather than the actual discounted revenue earned for the service.

🔴 DEFECT 1 EVIDENCE Groomer Forecast Omits Coupon Discount

Booking #130 • Groomer Portal Forecast vs Customer Receipt Confirmation

STATUS: FAIL

Customer Portal: Receipt REC-20261103-130 ✓ Correct Net Calculation

Verified Line: Base Service $95.00 − **Coupon SVC10P (-$9.50)** = **$85.50 Net**

Groomer Portal: Forecast Report (/groomer/forecast) ✕ Overstated Gross Value

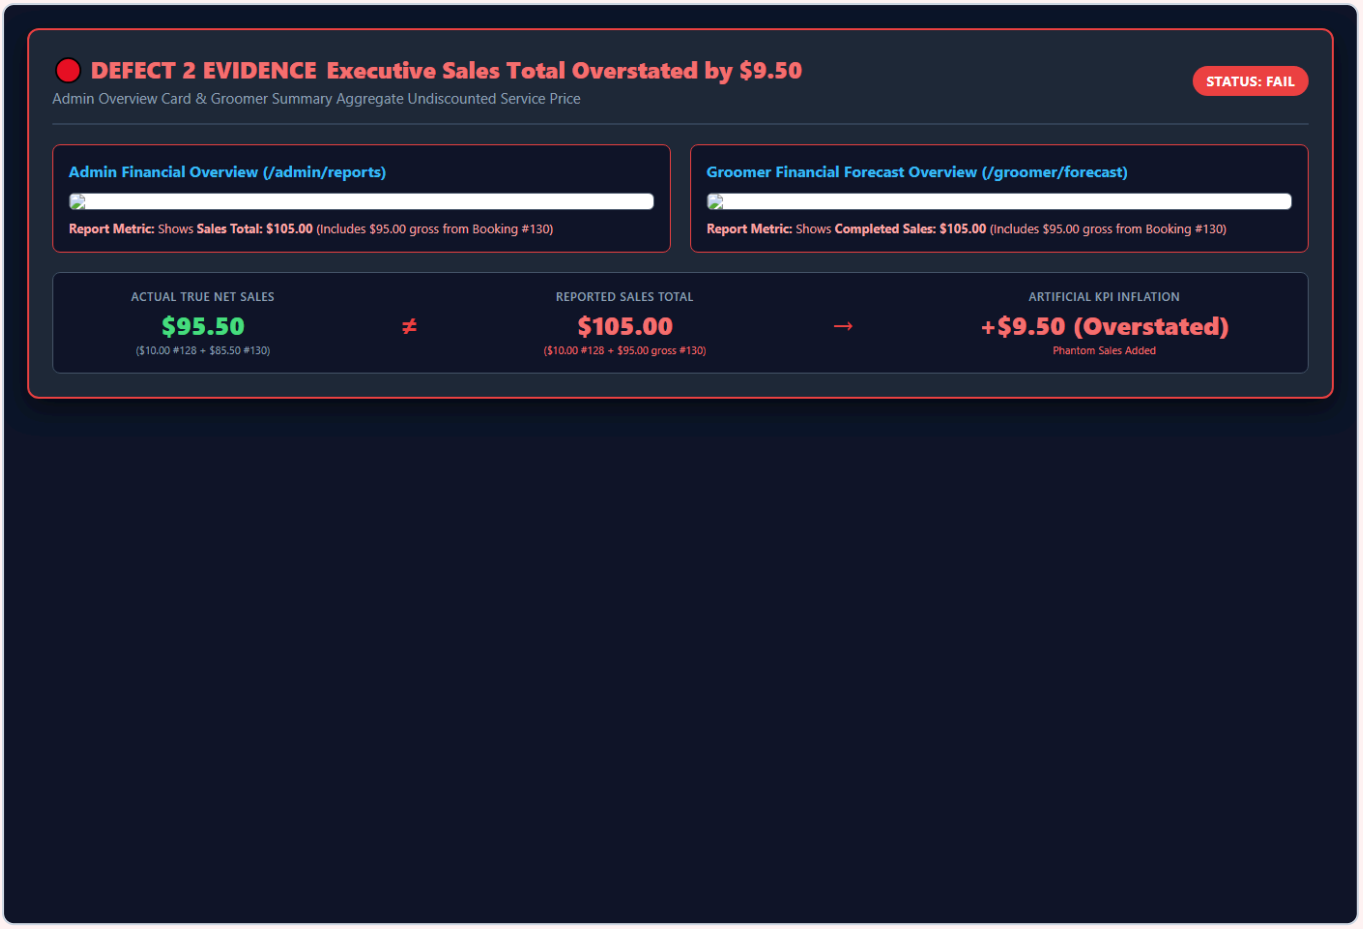

Defect In Report: Displays **Service: $95.00** (ignores -$9.50 coupon deduction completely)

CUSTOMER PAID (NET SERVICE)		GROOMER REPORTED SERVICE		UNACCOUNTED COUPON DISCOUNT
$85.50	≠	**$95.00**	→	**-$9.50 (Omitted)**

BUG 2: Groomer & Admin Revenue Summary Overstates Actual Sales Total

- **Location:** Admin Portal → Financial Reports Overview & Groomer Financial Summary
- **Actual Value:** `actualSalesTotal: $105.00` (sums $10 for #128 + $95 gross for #130)
- **Expected Value:** `actualSalesTotal: $95.50` ($10.00 + $85.50 discounted service fee)
- **Impact:** Both Groomer and Admin summary widgets overstate total completed service sales by $9.50.

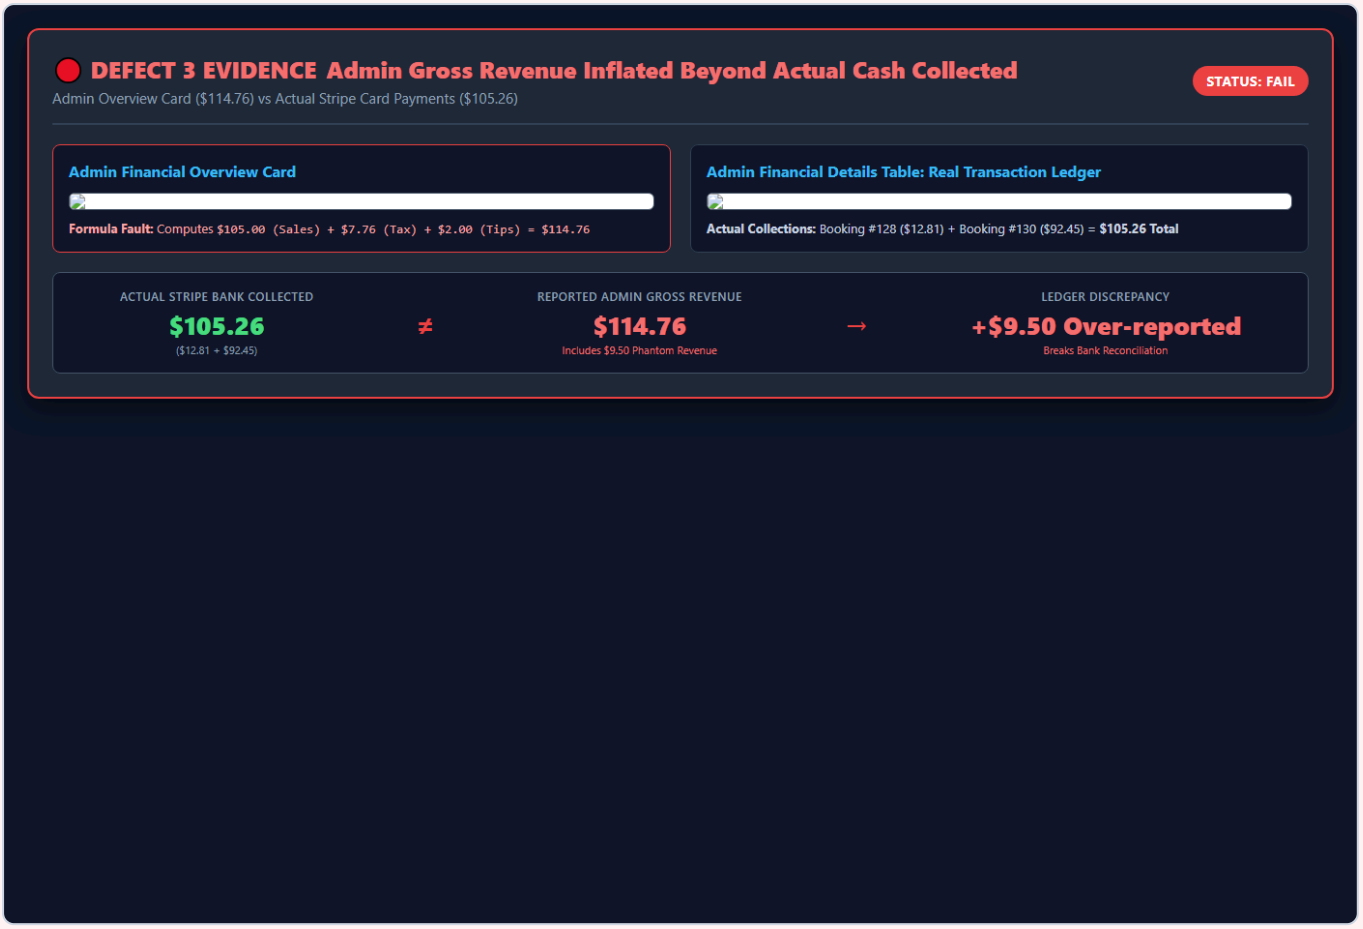

BUG 3: Admin Overview Gross Revenue Inflated Beyond Actual Cash Collected

• **Location:** Admin Financial Reports → Overview Card (`/admin/reports`)

• **Actual Value:** `actualGrossRevenue: $114.76`

• **Expected Value:** `actualGrossRevenue: $105.26` ($12.81 collected for #128 + $92.45 collected for #130)

• **Root Cause:** The server computes gross revenue as `actualSalesTotal ($105.00) + salesTax ($7.76) + tips ($2.00) = $114.76`. Because `actualSalesTotal` used the undiscounted price ($95.00), the coupon discount ($9.50) is phantom revenue never paid by the customer.

BUG 4: Groomer Forecast Internal Line Arithmetic Contradiction

• **Location:** Groomer Forecast Report Appointment Object

• **Equation:** `serviceAmount ($95.00) + taxAmount ($6.95) + tipAmount ($0.00) = $101.95 != totalAmount ($92.45)`

• **Impact:** Financial summary card reports `completedSalesAmount: $105.00`, which paradoxically exceeds `completedTotalCollected: $105.26` once $7.76 sales tax is accounted for.
