

ISSUE NUMBER	ISSUE TITLE	EXPECTED RESULT	ACTUAL RESULT	STEPS TO REPRODUCE	STATUS	TEST DATA
BUG_01	Location Provider – Duplicate Provider Creation	When creating a new Location Provider, the system should create only one unique provider record. Duplicate entries should not be created for the same provider.	When a Location Provider is created, the same provider is getting created as a duplicate entry.	Login as (Location) --> Provider Types --> Add provider type and see the table view	BUG	leo@mailinator.com password:Test@123
BUG_02	Appointment Missing Reason – Unexpected Error While Removing	The selected Appointment Missing Reason should be removed successfully without displaying any error.	Sometimes, when attempting to remove an Appointment Missing Reason, an "Unexpected Error Occurred. Please Try Later" error popup is displayed, and the record is not removed.	Login as (Location) --> Appointment-->Missing reasons	BUG	leo@mailinator.com password:Test@123
BUG_03	Appointment Missing Reason – Unexpected Error While Removing	The selected Appointment Missing Reason should be removed successfully without displaying any error.	Sometimes, when attempting to remove an Appointment Missing Reason, an "Unexpected Error Occurred. Please Try Later" error popup is displayed, and the record is not removed.	Login as (Location) --> Appointment-->Cancel reasons	BUG	leo@mailinator.com password:Test@123
BUG_04	Provider Availability – Work Start and End Time Validation Error	The system should allow the availability schedule to be saved successfully when valid working hours are provided. If the required time fields are missing, the system should display a clear validation message and prevent submission.	When editing the provider availability schedule, an alert is displayed: "notNull Violation: ProviderDailySchedules.WorkStartTime cannot be null, notNull Violation: ProviderDailySchedules.WorkEndTime cannot be null."	Login as (Location) --> Appointment-->Calendar --> Avaliability	BUG	leo@mailinator.com password:Test@123
BUG_05	Department Code – More Than 10 Digits Allowed in Input Field	The Department Code field should restrict the user to a maximum of 10 digits and should not allow more than 10 digits to be entered.	The field allows the user to enter more than 10 digits, but after exceeding the limit, it displays the validation message "Department code can't be more than 10."	Login as (Location) -->Department --> Code field --> Enter more than 10 numbers	BUG	leo@mailinator.com password:Test@123
BUG_06	Insurance Section – Broken Image Display	The Insurance section should display the correct image/icon without any broken image indicator.	A broken image icon is displayed next to the Insurances section, indicating that the image is not loading correctly.	Login as (Admin) --> Dashboard	BUG	leo@mailinator.com password:Test@123
BUG_07	Secondary Name – UI Mismatch	The Secondary Name field should be displayed with the correct UI layout, alignment, and formatting as per the approved design.	The Secondary Name field has a UI mismatch, with its label/value not aligned or displayed correctly compared to the expected design.	Login as (Admin) --> Dashboard	BUG	"leo@mailinator.com password:Test@123"
BUG_08	Practice Location – Location Login vs Admin Login Visibility Mismatch	The Practice Location menu should be displayed for both Location Login and Admin Login as per the required access/role configuration.	Practice Location is available under Location Login, but it is not displayed under Admin Login.	Login as (Admin) --> practice Location Login as (location) -->	BUG	leo@mailinator.com password:Test@123
